Subject: Microsft public deposition

Your Honor,

Since MS declares that they are so important to the US and the economy and that they are such innovators, blah, blah, blah, I would like my right as a US citizen and computer user enforced which allows me to hear the depositon of MS executives.

It was Bill Gates deposition which allowed the public to see the depth of Microsoft's soul and we should be allowed to see what the company that wants to control every aspect of our life is trying to hide from us.

Please allow every fact about MS' predatory, monopolistic behavior be known to all that were hurt by them.

Respectfully,

Frank D'angeli
